RADICAL PROSTATECTOMY - FINAL HISTOPATHOLOGY REPORT

PATIENT IDENTIFICATION

National ID:	**119590334218**
Medical Record No. (MRN):	BMC/URO/2024/03391
Patient Name:	Omar Khalifa Omar Al-Zawahi
Sex:	Male
Date of Birth:	1959-11-08
Age:	64 years
District (Baladiya):	Benghazi
City:	Benghazi - Al-Berka
Phone:	0915 220 774
Address:	Al-Berka district, street 12, house 44, Benghazi

NOTIFICATION

Reporting facility:	Benghazi Medical Centre
Notified by:	Dr. Idris Al-Shaib
Date of notification:	2024-04-02
Date of first symptom:	2024-01-18
Date of diagnosis:	2024-02-27
Basis of diagnosis:	6 - Histology of primary tumour

TUMOUR CHARACTERISTICS (ICD-O-3)

Primary site (Topography):	**C61.9 - Prostate gland, NOS**
Morphology:	**8140/3 - Adenocarcinoma, NOS**
Histological grade:	G2 - Moderately differentiated
Laterality:	0 - Not a paired site
Gleason score:	3 + 4 = 7 (Grade Group 2)
Tumour volume:	approx. 18% of gland volume
Extraprostatic extension:	Present, focal, right posterolateral
Seminal vesicle invasion:	Absent
Surgical margins:	Positive at right posterolateral margin
Lymphovascular invasion:	Absent
Perineural invasion:	Present
Regional lymph nodes:	0 / 12 nodes involved

Histology text: Prostatic acinar adenocarcinoma, Gleason score 3+4=7, with focal extraprostatic extension and perineural invasion. Margins focally involved.

STAGING - AJCC 8th Edition

Clinical TNM:	cT2c cN0 cM0
Clinical Stage:	Stage II
Pathological TNM:	**pT3a pN0 pM0**
Pathological Stage:	**Stage IIIA**

Summary stage (SEER):	Regional
Staging system:	AJCC 8th Edition
Date of staging:	2024-03-11
Metastatic sites:	None detected
Biomarkers:	PSA pre-op 14.8 ng/mL; PSA post-op (day 45) 0.06 ng/mL

TREATMENT SUMMARY

1) Surgery: Radical retropubic prostatectomy with bilateral pelvic lymph node dissection

Date:	2024-03-05
Facility:	Benghazi Medical Centre
Surgeon:	Dr. Idris Al-Shaib

2) Radiotherapy: Adjuvant EBRT to prostate bed, 66 Gy in 33 fractions

Start:	2024-05-14
End:	2024-06-28

3) Hormonal therapy: Bicalutamide 50 mg daily for 6 months

4) Chemotherapy: NOT given

5) Immunotherapy / targeted therapy: NOT applicable

First-course treatment within 4 months:	Yes
Main treatment centre:	Benghazi Medical Centre
Treatment response:	Complete response (CR)

FOLLOW-UP

Vitality status:	**Alive**
Last follow-up date:	2026-08-20
Disease status at last contact:	No evidence of disease (NED)
Recurrence:	No
Source of follow-up:	Outpatient clinic visit + telephone contact

RISK FACTORS & FAMILY HISTORY

Risk factors:	Family history (brother), high-fat diet, age over 60
Family history:	Brother diagnosed with prostate cancer in 2019, age 61

Consultant Urologist: Dr. Idris Al-Shaib *Signature: _____*

Report issued: 2024-03-11
