HAEMATO-ONCOLOGY DISCHARGE SUMMARY

PATIENT

National ID:	**120110778432**
Medical Record No.:	NCI-HEM-2026-0147
Patient Name:	Salma Nuri Salma Ben Amor
Sex:	Female
Date of Birth:	2011-06-30
Age at diagnosis:	14 years
District (Baladiya):	Sabha
City:	Sabha
Phone:	0922 118 306

DIAGNOSIS

Date of first symptom:	2026-01-09
Date of diagnosis:	2026-01-22
Basis of diagnosis:	6 - Histology of primary tumour (bone marrow trephine)
Primary site (ICD-O-3):	**C42.1 - Bone marrow**
Morphology (ICD-O-3):	**9811/3 - B-lymphoblastic leukaemia/lymphoma, NOS**
Grade:	Not applicable (G9)
Laterality:	0 - Not a paired site
Cytogenetics: normal karyotype 46,XX. FISH negative for BCR-ABL1, negative for MLL rearrangement. Flow cytometry: CD19+, CD10+, CD34+, TdT+.	
Risk stratification:	Standard risk (NCI: age 1-9.99 and WBC < 50 x10^9/L)
WBC at diagnosis:	18.4 x10^9/L
Blasts in marrow:	82%

STAGING

Staging system:	Not applicable - leukaemia
Clinical TNM:	Not applicable
Summary stage:	Not applicable
CNS involvement:	CNS-1 (no blasts in CSF)
Metastatic sites:	None - systemic disease

TREATMENT SUMMARY

1) Chemotherapy: BFM-like ALL protocol

Induction:	Vincristine, Daunorubicin, L-asparaginase, Prednisolone
CNS prophylaxis:	Intrathecal Methotrexate x 6
Consolidation cycles:	8 cycles
Start:	2026-01-28
End:	2026-09-10
Response:	Complete response (CR) - day 33 marrow MRD negative

2) Surgery: NOT performed (central venous line insertion only)

3) Radiotherapy: NOT given

4) Bone marrow transplant: NOT indicated at present

First-course treatment within 4 months: Yes

Main treatment centre: NCI Sabratha

FOLLOW-UP

Vitality status:	**Alive**
Last follow-up date:	2026-10-05
Disease status at last contact:	No evidence of disease (NED)
Recurrence:	No
Maintenance therapy:	6-MP + Methotrexate weekly, ongoing

Consultant Haematologist: Dr. Amal Ben Sassi Signature: _____

Report issued: 2026-10-08
